eLearning Overview

Odoo 19 Enterprise - eLearning

The eLearning module lets you create online courses and share them with employees or customers with videos, documents, quizzes, and certificates.

1 What eLearning does

eLearning

eLearning provides a course management system built into your Odoo website. Create courses with slides (videos, PDFs, web pages, quizzes), enrol employees or customers, track completion progress, and issue certificates. Use it for: onboarding new employees, product training for distributors, compliance training, or customer education.
