## Frontdesk Overview

Odoo 19 Enterprise • Frontdesk

---

The Frontdesk module manages visitor registration and check-in at your office – replacing paper sign-in books with a digital system.

### 1 What Frontdesk does

#### Frontdesk

Frontdesk provides a digital visitor management system. Visitors check in on a tablet at reception, their photo is taken, a badge is printed, and the host employee is notified by email or SMS. All visits are logged digitally for security compliance and building access records. Planned visits can be pre-registered to speed up arrival.
