Knowledge Overview

Odoo 19 Enterprise · Knowledge

The Knowledge module is a collaborative wiki that lets you create, organise, and share company documentation, processes, and know-how in a searchable internal knowledge base.

1 What Knowledge does

Knowledge

Knowledge provides a rich text editor for creating articles that are like Notion or Confluence built into Odoo. Articles are organised in a tree structure with nested pages. They can contain text, images, tables, embedded views from other Odoo modules (e.g. a live list of open opportunities), and file attachments. Access is controlled by workspace that some articles are company-wide, others are team-private.
