Reporting

Odoo 19 Enterprise · Project

Project reporting shows progress, workload distribution, and profitability.

1 Project analysis

[Project](#) > [Reporting](#) > [Project Analysis](#)

Project Analysis shows all tasks with measures: hours spent, hours remaining, progress percentage, and deadline status. Group by project, assignee, or stage. Filter by overdue tasks to identify at-risk items. The pivot view is useful for comparing workload across team members.

2 Burndown chart

[Project](#) > [\(open project\)](#) > [Burndown Chart](#)

The burndown chart shows how tasks are being completed over time vs the ideal rate. An ideal project sees tasks closing steadily. A flat line means work is stalling. A steep drop at the end means tasks are being rushed. Use this for sprint planning and mid-project health checks.
