Editing Pages

Odoo 19 Enterprise - Website

Edit any page on your website directly in the browser.

1 Enter edit mode

Website (any page) **EDIT**

Click Edit to enter the page editor. A building block panel appears on the right. The page is live-editable - click any text to type, drag blocks to rearrange, and drop new blocks from the panel onto the page. The toolbar at the top controls text formatting, colours, and animation. Click Save to publish changes immediately.

2 Building blocks

Building blocks are pre-designed sections: Banner, Cover, Text-Image, Features, Testimonials, Pricing Table, FAQ, Call to Action, Map, and many more. Drag any block onto the page and fill in the content. Each block is fully customisable - change colours to match your brand, resize images, and edit text inline.

Mobile view - Always check the mobile view before saving. Click the mobile icon in the editor toolbar to switch to the mobile preview. Most blocks are responsive automatically but images and columns sometimes need adjustment for small screens.
